Vision America

IFCA International Church Planting

Kingman Bible Church has made progress in development during first part of 2014. We have developed and adopted a constitution, we have a charter membership, and we are now incorporated as a nonprofit corporation in the State of Arizona.

The Lord has also led us to an opportunity to purchase property with a building. The building was originally built in 1977, and was built and used by a church. Therefore it has an auditorium, a kitchen, and a fellowship hall. It has had a variety of business owners over the years. The asking price was very reasonable,

and the owners agreed to carry a contract on the purchase. Now we are in the process of cleaning and repairing a number of items in the building. In the most recent project, we are building a portable baptistery because one of our ladies, who is now in her 80s, wants to be the first person baptized in our new building. We thank the Lord for her testimony. The property has been somewhat neglected in recent years, so it will require work and finances over a long period of time. But we have until the Lord comes. In the meantime

and the owners agreed to carry a contract on the purchase. Now we are in the process of cleaning and repairing a number of items in the building. In the most recent project, we are building a portable baptistery because one of our ladies, who is now in her 80s, wants to be the first person baptized in our new building. We thank the Lord for her testimony. The property has been somewhat neglected in recent years, so it will require work and finances over a long period of time. But we have until the Lord comes. In the meantime

one of the neediest areas. There is an eclectic mix of people in the neighborhood, and we have already made connections with several of the families. The people that have come to us up until about a week ago are all born again, mature, experienced believers in Christ. For several

weeks now I have been emphasizing the need to practice God's kind of love. What the Lord is now doing is opening doors of opportunity to homes with people of great spiritual, emotional, and

cultural needs. Most of the people in the nearby area are living in mobile homes. Some of them are very nice and well maintained, but some of them are in various stages of disrepair. I'm expecting, as we have already found, that some of the people will have very limited education and tend to be struggling financially. A number of them have serious

health problems. Others are well-educated and, from the appearance of their homes, they have done well financially. But the bottom line is that all the people in the entire Kingman area need the Lord.

There are several sound Bible teaching churches in Kingman, but many the churches are liberal or cults. I have met several the pastors in town who are committed to the Bible as the word of God. However, Kingman Bible Church is the only church in the nearby neighborhood. So we ask that you pray with us concerning outreach into the community. We are experiencing a slow, but healthy, growth. A primary need is for the Lord to bring the servant of his choice to join our ministry and continue the work when I retire (or retread) again.
